

WELL™ 2.0

About this light

WELL™ 2.0 makes battery-operated uplighting even easier with tri-colored LEDs calibrated to ensure consistency among fixtures as well as the COLORado™ line. WELL™ 2.0 runs on a built-in 12-volt battery capable of running for over 12 consecutive hours. For control, standard DMX ports are available as well as a pre-installed Wireless Solution W-DMX receiver with a new fixed antenna for better reception. The unit's reflective casing helps it blend in any environment where discreet installation is key. The charging base has also been improved to provide easy charging in any orientation within the 6-unit road case.
